

Microsoft 365 Copilot — Participant Handout

Risk & Compliance | Bajaj Finance Limited

Half-Day Workshop | M365 Copilot for Risk & Compliance Teams

Technizer India | In partnership with Bajaj Finance Limited
Prompt Framework: **RTCFT** (Role · Task · Context · Format · Tone)

SESSION OVERVIEW

Parameter	Detail
Duration	3.5 Hours (Half-Day)
Audience	Risk Analysts · Compliance Officers · Fraud Investigators · Portfolio Managers
Dataset	BFL_Risk_Compliance_Copilot_Dataset.xlsx
Policy Document	RBI_Policy.pdf — RBI (NBFC Internal Ombudsman) Directions, 2026
Tools Covered	Copilot Chat · Copilot in Excel · Copilot in Outlook
Framework	RTCFT — applied across all 5 use cases

WHAT YOU WILL BE ABLE TO DO AFTER THIS SESSION

1. Write high-quality Copilot prompts using the **RTCFT framework**
2. Use **Copilot in Excel** to analyse loan portfolios and surface DPD trends and risk signals
3. Use **Copilot Chat** to extract compliance obligations from real RBI regulatory documents
4. Use **Copilot Chat** to draft risk reports, gap analyses, and Board-level summaries
5. Use **Copilot in Outlook** to communicate risk findings with the right tone and urgency
6. Identify **your own top 3 use cases** where Copilot can save you time every week

THE RTCFT FRAMEWORK

Every strong Copilot prompt has 5 elements. Together they remove ambiguity and give Copilot exactly what it needs to produce useful output.

Element	What It Means	Example for Risk & Compliance
R — Role	Who should Copilot act as?	"You are a senior credit risk analyst at Bajaj Finance..."
T — Task	What specific action should it perform?	"...analyse the DPD bucket distribution and flag NPA accounts..."
C — Context	What data, background, or	"...Q1 FY26 portfolio data; Gross NPA threshold is

Element	What It Means	Example for Risk & Compliance
	constraints apply?	4.5%..."
F — Format	How should the output be structured?	"...output as a table with a 3-bullet executive summary..."
T — Tone	What style or register is needed?	"...formal, risk-aware tone suitable for MD review."

✗ Weak Prompt vs ✓ Strong Prompt

	Example
✗ Weak	"Summarise the loan data"
✓ Strong	"You are a credit risk analyst at BFL. Analyse the attached loan portfolio for Q1 FY26 and identify all accounts in the 91+ DPD bucket. Show total outstanding and provision, and flag any accounts where provision coverage is below 65%. Table format. Formal tone for Credit Risk Committee."

USE CASE 1 — Credit Portfolio Risk Analysis

Tool: Copilot in Excel + Copilot Chat **Dataset Sheet:** Loan Portfolio Risk

The Problem Today

Filtering DPD buckets, calculating provision totals, writing the executive summary — done manually across multiple tools, taking 45–60 minutes per cycle.

With Copilot

The same analysis takes 4–5 minutes with a well-structured RTCFT prompt.

PROMPT 1A — Portfolio Risk Summary

Role: You are a senior credit risk analyst at Bajaj Finance Limited.

Task: Analyse the loan portfolio data from the attached Excel file and prepare a Portfolio Risk Summary for the Credit Risk Committee.

Context: The dataset covers 28 retail loans across Q1 FY2025-26. Key thresholds

- Gross NPA > 4.5% = breach; SMA accounts > 10% = early warning; Provision Coverage Ratio should exceed 65%. Flag any loan where DPD is 91 or higher as requiring immediate action.

Format:

1. Executive Summary (3 bullet points – key findings only)
2. DPD Bucket Distribution Table (Bucket | Count | Outstanding | Provision)

3. Top 3 At-Risk Accounts (Loan ID | DPD | Outstanding | Recommended Action)

4. Risk Committee Recommendations (numbered list, max 5 items)

Tone: Formal, precise, risk-aware. Use specific numbers from the data.

Suitable for MD-level review.

PROMPT 1B — Copilot in Excel (Natural Language)

Highlight all loans in the 91-180 DPD and 180+ DPD buckets in red.

Add a new column called "Action Priority" – mark these accounts as "Immediate", accounts in 61-90 DPD as "Urgent", and all others as "Monitor".

Show me the total outstanding and provision amount for Immediate priority accounts.

USE CASE 2 — Fraud Pattern Identification

Tool: Copilot Chat **Dataset Sheet:** Fraud Pattern Detection

The Problem Today

Reviewing 200–500 flagged transactions weekly, manually highlighting anomalies, and writing individual STR narratives — time-consuming and inconsistent.

With Copilot

Copilot filters by anomaly score, identifies fraud typologies, and drafts an STR narrative shell in seconds.

PROMPT 2A — Fraud Pattern Summary

Role: You are a fraud risk investigator at a large Indian NBFC.

Task: Review the transaction monitoring data and identify the top fraud risk patterns for June 2025. Prioritise accounts where Anomaly Score > 0.75 AND Investigation Status is "Under Investigation" or "Confirmed Fraud".

Context: Dataset contains 25 flagged transactions. Key indicators – geo-mismatch (Location = "Unknown" or "Foreign IP"), velocity flags (column J ≠ "No Flag"), high-value transactions (> ₹2,00,000) with suspicious merchants, multiple attempts within 24 hours.

Format:

- Section 1: Top 5 High-Risk Transactions (TX ID | Customer | Amount | Anomaly Score | Pattern Type | Recommended Action)
- Section 2: Pattern Analysis – 3-4 bullets on emerging fraud typologies
- Section 3: STR Draft Template – 150-word FIU-compliant shell for the

highest-risk transaction

Tone: Investigative, factual, legally defensible. Flag only what the data supports.

PROMPT 2B — Fraud Alert Email (Copilot in Outlook)

Role: You are the Head of Fraud Risk at Bajaj Finance.

Task: Draft an urgent internal email to Branch Heads alerting them to a spike in UPI fraud attempts in June 2025.

Context: 186 UPI fraud attempts this month vs threshold of 100. Three confirmed fraud cases; 8 under investigation. Dominant patterns: geo-mismatch and high-velocity transfers.

Format: Email – Subject line, brief opening, 3 key data points as bullets, specific instructions for branch staff (2–3 action items), escalation contact.

Tone: Urgent but measured. Authoritative without causing panic.

USE CASE 3 — Risk Reporting

Tool: Copilot Chat + Copilot in Outlook **Dataset Sheet:** Risk Reporting Dashboard

The Problem Today

Pulling KPIs from multiple systems, writing dashboard commentary, and drafting the monthly management report — typically a half-day task.

With Copilot

Copilot reads the dashboard data and produces board-ready commentary with exception-based reporting in minutes.

PROMPT 3A — Monthly Risk Commentary

Role: You are the Chief Risk Officer of Bajaj Finance Limited.

Task: Write the Monthly Risk Commentary for June 2025 for submission to the Risk Management Committee (RMC).

Context: Dashboard shows – Gross NPA at 4.10% (threshold 4.5%, status: WATCH), Collection Efficiency at 96.8% (threshold >96%, barely compliant), SMA-0 accounts at 9.1% (threshold <10%, status: WATCH). All other indicators (Net NPA, PCR, CAR, Write-off Rate) are within acceptable bands. 4.5% of portfolio is in the Loss category (180+ DPD) – highest in 3 quarters.

Format:

1. Opening – Key Risk Stance (2 sentences, traffic-

Light: Green/Amber/Red)

2. KPI Table (Indicator | Status | MoM Change | Commentary)

3. Watch Items – 2 items needing committee attention (1 paragraph each)

4. Forward-Looking Indicators – 2 emerging signals for next 30 days

5. Recommended Actions – numbered list for CRO sign-off

Tone: Board-level. Concise, data-backed. Every statement references a metric.

PROMPT 3B — Exception Report for Zonal Heads

Role: You are a Risk Reporting Analyst at Bajaj Finance.

Task: Prepare an exception report highlighting only DPD buckets that have breached or are approaching threshold – for distribution to Zonal Collection Heads.

Context: Flag buckets where portfolio share > 4% (currently 180+ DPD at 4.5%) or where roll rates are increasing. Exclude Standard (0 DPD) accounts.

Format: One section per flagged bucket – Bucket | Outstanding (₹ Cr) | % of Portfolio | Threshold | Action Recommended. End with a summary action table for field teams.

Tone: Operational, direct, action-oriented. Simple language – no finance jargon.

USE CASE 4 — Policy and Compliance Review

Tool: Copilot Chat (with PDF upload) **Dataset Sheet:** Policy Compliance Tracker **Policy Document:** RBI_Policy.pdf — RBI (NBFC Internal Ombudsman) Directions, 2026

The Problem Today

Reading a 18-page RBI circular, extracting every obligation, mapping it to an internal owner, flagging deadlines, and updating the tracker — typically 2–3 hours of careful manual work.

With Copilot

Upload the PDF directly to Copilot Chat. With the right RTCFT prompt, Copilot extracts all obligations in a structured table in under 60 seconds.

About the RBI Document

Document: Reserve Bank of India (Non-Banking Financial Companies — Internal Ombudsman) Directions, 2026 **Reference:** RBI/CEPD/2025-26/384 | Issued: January 14, 2026 | Pages: 18

Applies to BFL? Yes — BFL is a Non-Deposit taking NBFC with assets above ₹5,000 crore with public customer interface. Fully applicable.

Three clauses with hard deadline — June 30, 2026:

Clause	What BFL Must Do
7(2)	Board to determine IO / Dy. IO headcount annually based on complaint volume
14(2)	Deploy fully automated Complaint Management System with IO access
14(4)	CMS must use exactly 3 categories: Fully Resolved / Partially Resolved / Wholly Rejected

PROMPT 4A — Obligation Extraction from RBI Direction

Role: You are a Senior Compliance Officer at Bajaj Finance Limited.

Task: Read the attached RBI Direction (Non-Banking Financial Companies – Internal Ombudsman Directions, 2026) and extract ALL compliance obligations that are mandatory for BFL.

Context: BFL is a Non-Deposit taking NBFC (NBFC-ND) with asset size exceeding ₹5,000 crore with a public customer interface – these Directions are fully applicable to BFL. The Direction was issued on January 14, 2026. Three provisions have a hard compliance deadline of June 30, 2026: Clauses 7(2), 14(2), and 14(4). Ignore clauses applicable only to excluded categories (HFC, CIC, IDF-NBFC, NBFC-IFC, NOFHC, Primary Dealers, MGC).

Format: Structured table –

- Clause Reference
- Area (e.g., IO Appointment / CMS / Board Oversight)
- Obligation Description (precise, actionable)
- Responsible Owner at BFL
- Compliance Timeline
- Priority: HIGH / MEDIUM

After the table, add a section: "IMMEDIATE ACTIONS – June 30, 2026 Deadline"

listing only the three deadline items with specific steps.

Tone: Formal regulatory language. Precise and actionable. Suitable for MD review.

PROMPT 4B — Gap Analysis Against Existing Tracker

Role: You are the Head of Compliance at Bajaj Finance Limited.

Task: Compare the obligations in this attached RBI Direction with BFL's current Policy Compliance Tracker and identify compliance gaps requiring immediate action.

Context: The Policy Compliance Tracker shows the Ombudsman Scheme row with status "WATCH" – TAT breach noted in 3 cases, last updated April 2025. The new RBI Direction (January 2026) introduces four requirements not yet in the tracker:
(a) Fully automated CMS with auto-escalation by June 30, 2026

- (b) Mandatory 3-category CMS classification system by June 30, 2026
- (c) Annual Board determination of IO/Dy.IO headcount by June 30, 2026
- (d) New 23-point quarterly reporting format to RBI CEPD

Format:

1. Gap Analysis Table – Requirement | Current BFL Status | Gap (Yes/No) | Remediation Action | Owner | Target Date
2. Executive Summary – 3 bullet points for MD review
3. Tracker Update Recommendations – rows to be added or updated

Tone: Compliance advisory. Direct about gaps, solution-focused, no ambiguity.

PROMPT 4C — Board Note Drafting

Role: You are the Company Secretary of Bajaj Finance Limited.

Task: Draft a Board Note for the next Board meeting seeking approval for BFL's implementation plan for the RBI Internal Ombudsman Directions, 2026.

Context: The Direction (RBI/CEPD/2025-26/384) was issued January 14, 2026, effective immediately. BFL already has an Internal Ombudsman from the 2023 Direction. Three provisions require Board action by June 30, 2026:

- (1) Board determination of IO/Dy.IO headcount [Cl. 7(2)]
- (2) Deployment of fully automated CMS with IO access [Cl. 14(2)]
- (3) Implementation of 3-category complaint classification [Cl. 14(4)]

Additional ongoing obligations: 30-day complaint TAT, quarterly RBI CEPD reporting, IO appointment notification within 5 working days.

Estimated CMS upgrade cost: ₹45–60 lakhs (to be confirmed by IT team).

Format: Formal Board Note –

- 1. Reference and Date
- 2. Subject
- 3. Regulatory Background (2 paragraphs)
- 4. Key Obligations Table (Clause | Requirement | Deadline | Owner)
- 5. Proposed Implementation Plan (milestone table with dates)
- 6. Budget Approval Sought
- 7. Recommendations (numbered, for Board resolution)

Tone: Formal board communication. Precise about obligations and deadlines.

PROMPT 4D — Quarterly Compliance Status Report

Role: You are the Head of Compliance at Bajaj Finance Limited.

Task: Generate a Quarterly Compliance Status Report for Q1 FY2025–26 based

on the Policy Compliance Tracker data and the attached RBI Direction.

Context: The tracker covers 10 regulatory requirements including RBI KYC norms, SARFAESI, PMLA/AML, DPDP Act, and IRAC norms. Current status – 7 COMPLIANT, 2 WATCH (Fair Practices Code, Ombudsman TAT), 1 AT RISK (DPDP Act consent framework). The RBI Internal Ombudsman Directions 2026 require new rows to be added to the tracker with June 30, 2026 deadlines.

Format:

1. Compliance Health Dashboard – traffic-light table (Policy | Regulatory Body | Status | Key Action)
2. At-Risk and Watch Items – root cause and remediation plan for each
3. New Obligations from RBI IO Directions 2026 – rows to add to tracker
4. Upcoming Review Calendar – next 30 days, policies due and owners
5. Board Certification Statement – 2-paragraph certification for MD signature

Tone: Formal regulatory language. Precise about deadlines and owners.

Board-appropriate.

USE CASE 5 — Risk Monitoring & Early Warning Signals

Tool: Copilot Chat **Dataset Sheet:** Risk Monitoring Signals

The Problem Today

Checking 12–15 risk indicators weekly, writing narratives for each HIGH/MEDIUM signal, preparing the weekly risk brief for the CRO — a 2–3 hour manual task.

With Copilot

Copilot scans all EWS signals, produces a prioritised CRO brief, and generates escalation memos for HIGH alerts automatically.

PROMPT 5A — Early Warning Signal Brief for CRO

Role: You are the Risk Monitoring Head at Bajaj Finance.

Task: Prepare the Weekly Early Warning Signal (EWS) Brief for the CRO, covering all HIGH and MEDIUM alerts from Q1 FY26 monitoring.

Context: The EWS dashboard covers 12 signals across Credit, Fraud, Liquidity, Market, Operational, Cyber, Regulatory, and Reputation risk categories.

HIGH alerts (3): SMA-0 roll rate (12.4% vs 10% threshold), UPI fraud spike (186 vs 100 threshold), Rural collection efficiency decline (93.1% vs 95%).

MEDIUM alerts: Restructured loan SMA migration, Repo rate NIM sensitivity,
Pending RBI audit observations, ALM gap.

Format:

1. Executive Flash (5 lines max) – overall risk posture this week
2. HIGH Alerts – Signal | Current Level | Threshold | Root Cause |
Recommended Action | Owner | Deadline
3. MEDIUM Alerts – condensed table format
4. Watch for Next week – 2 signals showing deteriorating trend

Tone: Crisp, intelligence-brief style. Every HIGH alert must have a specific recommended action, owner, and deadline. No generic statements.

PROMPT 5B — Escalation Email for Cyber Risk Alert

Role: You are the CISO of Bajaj Finance Limited.

Task: Draft an escalation email to the MD and CRO regarding a HIGH-rated cyber risk alert – a spike in phishing attempts on customer-facing portals.

Context: EWS-008 shows 340 phishing attempts in June 2025 (threshold: <200).

Two attempts nearly succeeded (detected at login stage).

Actions initiated:

2FA enforcement approved; staff phishing simulation

scheduled next week.

Risk if breach occurs: data of ~50,000 customers exposed, triggering DPDP

Act regulatory action and reputational damage.

Format: Escalation email – Subject, situation summary (3 lines), risk impact (bullets), actions taken (bullets), decision required from MD/CRO (2 specific asks), proposed review meeting request.

Tone: Urgent, factual, solution-focused. Serious without causing alarm.

HANDS-ON LABS

Lab 1 — Portfolio Triage (15 minutes)

1. Open `BFL_Risk_Compliance_Copilot_Dataset.xlsx` → `Loan Portfolio Risk` sheet
2. Open Copilot in Excel and type:

Identify all accounts with DPD > 60 days and Risk Rating C or D.

Show me the total outstanding amount for these accounts and calculate

what % of the total portfolio they represent.

Highlight these rows in red.

3. Then open Copilot Chat, attach the file, and run **Prompt 1A**
 4. What did Copilot surface that you might have missed manually?
-

Lab 2 — Build Your Own RTCFT Prompt (20 minutes)

Pick one scenario and write a full RTCFT prompt. Run it in Copilot Chat and share your output with the group.

Card	Your Scenario
A	Present the fraud monitoring summary to your Zonal Head tomorrow
B	A new RBI circular on KYC has arrived — summarise its implications for your team
C	Collection efficiency in your zone has dropped — write a field action plan
D	Update the Board Compliance Certificate for Q1
E	The CRO wants a 5-minute verbal brief — prepare talking points from EWS data

Your RTCFT Prompt:

Element	Your Draft
Role	
Task	
Context	
Format	
Tone	

Lab 3 — Before & After Email (10 minutes)

Scenario: Email your manager about 3 accounts that have crossed into NPA (91+ DPD) this month.

Step 1: Write the email yourself — 3 minutes, no Copilot.

Step 2: Run this in Copilot in Outlook:

Role: Risk Analyst at Bajaj Finance.

Task: Draft an internal email to my manager about 3 accounts crossing into

NPA (91+ DPD) status this month.

Context: Accounts – BFL20250009 (₹98,500 outstanding, 91 DPD),

BFL20250014 (₹1,85,000, 91 DPD), BFL20250021 (₹2,50,000, 180+ DPD).

SARFAESI notices being prepared for the 180+ DPD account. Provisioning updated per IRAC norms.

Format: Short email – Subject, 2-line context, 3-bullet account summary, next steps.

Tone: Factual, professional, no urgency exaggeration.

Reflection: How is the Copilot version different in structure, completeness, and tone?

PROMPT CHEAT SHEET

Keep this as your desk reference after the session.

Portfolio Risk Analysis

"You are a credit risk analyst. Analyse the attached loan data. Identify accounts where DPD > 60 and outstanding > ₹1 lakh. Table sorted by risk priority. Formal tone for CRC."

Fraud Pattern Detection

"You are a fraud investigator. From the transaction data, list all transactions with Anomaly Score > 0.75 and non-standard locations. Draft a 100-word FIU-compliant STR shell for the top case."

RBI Policy — Obligation Extraction

"You are Head of Compliance at BFL. Read the attached RBI Direction and extract all obligations for BFL (NBFC-ND, assets ≥ ₹5,000 Cr). Table: Clause | Obligation | Owner | Deadline | Priority. Flag June 30, 2026 items separately."

Compliance Gap Analysis

"You are Head of Compliance. Compare this RBI Direction against BFL's tracker. Table: Requirement | Current Status | Gap | Remediation | Owner | Target Date. End with 3-bullet MD summary."

Monthly Risk Commentary

"You are CRO. Write the monthly risk commentary for RMC based on the attached dashboard. Gross NPA threshold 4.5%. Include KPI table, 2 watch items, forward-looking signals, and recommended actions. Board-level tone."

EWS Brief for CRO

"You are Risk Monitoring Head. Write a weekly EWS brief covering only HIGH and MEDIUM alerts. Each HIGH alert: current level | threshold | root cause | action | owner | deadline. Intelligence-brief style."

Escalation Email

"You are CISO. Draft an escalation email to MD and CRO about a cyber risk spike. Include: situation (3 lines), risk impact (bullets), actions taken (bullets), 2 specific decisions required. Urgent but

COMMON PROMPT MISTAKES — AND HOW TO FIX THEM

Weak Prompt	Why It Fails	Fix It
"Summarise the data"	Too vague — Copilot doesn't know what matters	Add Role + specify which KPIs, which thresholds
"write a risk report"	No structure — output is a free-form essay	Add Format with numbered sections
"Be professional"	Too generic — every output will feel the same	Specify the audience: "Board-level" / "field team" / "regulator"
"Check compliance"	No context on which regulation or threshold	Name the regulation, state the threshold and deadline
Copy Copilot output directly	Risk of errors if file wasn't attached or data was misread	Always verify numbers against the source file

MY ACTION PLAN

After this session, I will use Copilot for these 3 tasks in my daily work:

#	Task	Tool I Will Use	Time I Expect to Save
1			
2			

#	Task	Tool I Will Use	Time I Expect to Save
3
